

Connect to your future workforce at our local schools

Raise the Bar Hancock County, with support from The Findlay-Hancock County Chamber of Commerce, is helping area students identify their talents and connect to local employers. Sign up for your free listing today!

Thanks to this partnership, Hancock County school districts have access to YouScience® Aptitude & Career Discovery. This science-backed aptitude assessment utilizes a series of brain games, to help students—your future employees—in our area identify their natural talents and discover jobs and career pathways that align with those talents. This can lead young people in our community to careers they never considered previously but would excel in. Often, these are the very same careers you may have the most challenging time filling.

You can join for free to create an employer listing and showcase your business to these students through YouScience® Employer Spotlight. We need all of our members to share information with these students so they start to see the opportunities available to them in their own community. It's about talent placement and talent retention. Listings on the platform are free!

How do I create a free employer profile?

- 1** Your Employer Spotlight experience starts with creating an account and then signing in at employers.youscience.com
- 2** Click the 'For employers' link at the bottom left to access your login page.
- 3** Complete the required fields and agree to the Terms of Service to set up your account.
- 4** You will receive an email to verify the account. Click that to complete your account setup.
- 5** Return to the login page and enter your email address and password to view your employer homepage.
- 6** One of the tiles you'll see is 'Manage Your Profile.' Here, you can post information for students and educators to review, including your organization, your social media links, work-based learning opportunities you offer, and the kinds of careers and entry-level jobs you value.

What else can I do?

While basic listings on the platform are always free, there are premium options that provide far greater visibility and information. Premium listings can sponsor careers and certifications for sitewide display, they can upload video content, and they get exclusive access to a data panel showing the talent makeup of local schools and their visibility on the platform. Sponsoring is a great way to make your company stand out to students with the aptitude to pursue your highest-value careers!

Which schools are using this resource?
